

The Future of College Health

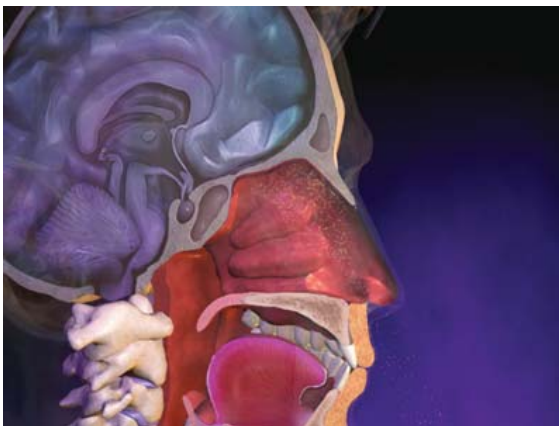

PracticeIT delivers tools for efficient charting and patient management. Our friendly solution allows for flexible documentation that doesn't distract from the time you spend with your patients. Interactive 3D patient education, robust document management and portable diagnostic devices round out our commitment to student health, provided at a cost any college can afford.

Patient Care and Management:

- Simple, flexible charting: write, type or click
- E-prescribing with SureScripts™ & RxHub
- 3D, interactive patient education
- User dashboard with sort & filter
- Color-coded scheduling tool
- Student demographics & visit details
- Emails, phone calls, refill management

3D Patient Education:

- Accurate, informative educational animations
- Rotating 3D Models & Slides with zoom, definitions and drawing tools
- Printable text for patient take-home
- Easily accessibility during the patient visit
- Ability to code and bill for patient education

Portable Diagnostic Devices:

- World's smallest, lightest EKG & Spirometer
- Fits in your hand or lab coat pocket
- Connect by USB, PC card or serial port to turn your laptop or tablet into a portable diagnostic center
- Revenue generation through 3rd party billing
- Blood pressure and combination vitals in '08

Available Network Configuration Includes:

- Portable Motion tablets with Handwriting-to-Text conversion
- Dell desktop PCs with flat screen monitors
- Real-Time intra-office communication regarding orders and results, refills and phone consults
